Python 2 reached its official end-of-life at the start of 2020. This means that no new bug reports, fixes, or changes will be made to Python 2 - it's no longer supported: see [PEP 373](#) and [status of Python versions](#).

Si está buscando portar un módulo de extensión en lugar de código Python puro, consulte [cporting-howto](#).

The archived [python-porting](#) mailing list may contain some useful guidance.

Since Python 3.13 the original porting guide was discontinued. You can find the old guide in the [archive](#).

1 Third-party guides

There are also multiple third-party guides that might be useful:

- [Guide by Fedora](#)
- [PyCon 2020 tutorial](#)
- [Guide by DigitalOcean](#)
- [Guide by ActiveState](#)
