Python 2 reached its official end-of-life at the start of 2020. This means that no new bug reports, fixes, or changes will be made to Python 2 - it's no longer supported: see **PEP 373** and status of Python versions.

순수 파이썬 코드 대신 확장 모듈을 이식하려고 한다면 cporting-howto를 참조하십시오.

The archived python-porting mailing list may contain some useful guidance.

Since Python 3.11 the original porting guide was discontinued. You can find the old guide in the archive.
